

# Animals On The Move

by Nick Young

## Instructions:

During this song, the children will be crawling, hopping and flying around the group space. Make a point about the “Invisible Bubble” in your introduction and be alert for any bumping or pushing during the song. When children do bump or push their friends, gently remind them to move where there is room for their body. **Track #4**

## Intro:

Tell the children, “Now we get to move our bodies like different kinds of animals. The first one is a spider crawling on the floor. You can do the backwards crab crawl or a frontward crawl. But first, put your invisible bubble around your whole body. That means that your body will not bump or touch your friends body. Make sure that you move your body where there is room to go without bumping your friends.”

## Lyrics:

Spiders are creeping X4  
 Creep around the circle and stop  
 Snakes that slither X4  
 Slither round the circle and stop  
 Dolphins are swimming X4  
 Swim around the circle and stop  
 Birds are flying X4  
 Fly around the circle and stop

---

Now think of all the animals in the whole world and move you're body like any animal that you choose... *here we go!*

## chords: Am Em7 B, A G# F#

Animals are on the move, on the move  
 Be any animal that you choose, that you choose  
 In the forest, in the trees, in the jungle, or in the sea  
 Animals are on the move  
 I see some tigers that are crawling in the jungle  
 I see whales swimming in the ocean  
 I see all kinds of animals  
 Now turn into an elephant  
 Elephants walking X4  
 Walk around the circle and stop
